

The UNIFLEX KS 6, KS 8 and KS 10 are designed for precision crimping and calibration.

High-level components and system solutions

Slide bearing technology

Grease-free for extra cleanliness and prolonged service life

Maximised productivity at very low operating costs

Chips brush off easily, minimising tool wear

Clean machining area

Reduces crimping force loss by up to 20%

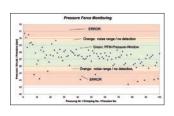

High process stability and reproducible accuracy

CE complian

KS 6, KS 8, KS 10

Standard - Pressure Force Monitoring

PFM – Standard on all machines with Control C.2

Quality-enhancing option for series production. With PFM, the upper and lower pressure limits can be set by adjusting the tolerance values obtained from test pressing.

Pressures outside these limits are output as errors. It is possible to let the machine switch off at a fixed upper or lower limit, thereby obtaining a higher process safety.

This way you can display and record combinations of incorrect hose and fittings, skipped work stage, such as skiving of the hose or a poorly positioned hose-fitting connection. Achieve integrated quality control without any additional effort.

Standard

PS Double foot pedal

We reserve the right to make technical changes without notice. Options are machine parts that can only be ordered while buying the machine.

KS 6, KS 8, KS 10

| Technical data | KS 6 | KS 8 | KS 10 |
|--|-----------------------|-----------------------|-----------------------|
