

Re-live our anniversary celebration 40 years of UNIFLEX!

Our week of anniversary celebrations got off to a great start with brilliant sunshine and an Open Day on 13 May 2012. The CEO's Friedrich von Waitz, Harald von Waitz and Patrick Sticker gave addresses, and the company's founder Peter Schröck, a qualified engineer, also gave a short speech to mark the occasion (photo, centre).

Councillor Phillip von Leonhardi and Otmar Stein, deputy Mayor of Karben, took up our invitation, as did the local papers, residents, customers and suppliers, and of course the staff of UNIFLEX Hydraulik turned out in strength with their families. With mouth-watering food, refreshing drinks, coffee and cakes on offer as well as live music and an extensive program of entertainments, everyone was happy to help the celebrations along. On the next day,

we invited our customers and suppliers to a special program of anniversary events and it was possible to strengthen our business relationships in detailed discussions. In various workshops one could get a deeper insight into the subject of hydraulics. We extend our grateful thanks to all those who accepted our invitation. We also pay tribute to all our staff for their work and commitment, to all our suppliers for their reliability and to our customers for the excellent business relations and the confidence they display in us – these are all people who have made our 40th anniversary possible. It is our sincere hope that we will be able to welcome all to the 50th anniversary celebrations of

EM 115 - UNIFLEX Hose Cutting Machine

The EM 115 is a highly productive cutting machine. The machine is best suited for high volume manufacturing of 2" hoses along with workshop capability for 3" high pressure hose and 4" industrial hose.

Unique drive motors with double bearings and oversized shafts to avoid vibration and extended lifetime

- Maximizes blade and motor life
- Cuts faster increasing productivity
- Straighter cuts improves quality and reduces scrap
- Saves energy

Lateral guide rollers and holding clamps for precise cuts

- Consistent cuts improve your customer's satisfaction
- Reduce scrap costs
- Lowers liability

Quality steel blade

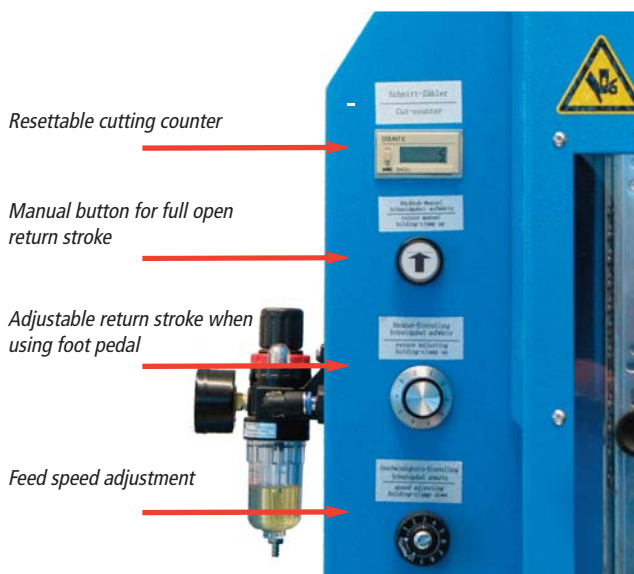

- German engineered blades lower operation costs lasting longer before replacement and longer cutting life between sharpening

Brake motor and operating guarding

- Meets CE and worldwide standards for safety
- Reduces liability

More information can be found on our website (also the video for the EM115 - www.uniflex.de/produkte/trennmaschinen/em-115) or directly from our sales department.

Cutting blade (slitted)	TMG 520 x 4 x 40 mm
Workshop SAE R13 & R15	3"
Production SAE R13 & R15	2"
Industrial	4"
Max. hose o.D.	Ø 125 mm
Drive	7,5 kW
Suction Connection	Ø 108 mm
Noise	80 dB(A)
L x W x H	1210 x 650 x 1650 mm
Working height	925 mm
Weight	245 kg

UWT 2 - UNIFLEX Hose Coiling Reel

Hose coiling reel with foot pedal and electric drive for easy winding and unwinding of hoses up to 1 1/4". This tool is a time and space saving piece of equipment that will increase your productivity leading to higher profitability.

Easy handling

- Access holes help in bundling and removing the hose coil
- Five adjustable pins and eyebolts to accommodate starting the coil with various hose diameters
- Capable of CW and CCW winding for flexibility in positioning of the stand

Quality & Safety

- Rugged design
- Mechanical safety clutch
- Pedestal includes four floor mounting holes
- Safety foot pedal

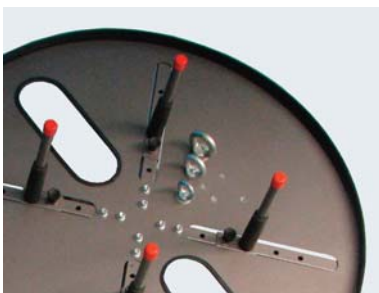

Mean height
1100 mm

Foot pedal (CW / CCW)

You want more information about UWT 2? The data sheet is available for download on our website or contact us directly.

adjustable pins and eyebolts

Easy to bundle the hose

hoses up to	1 1/4"
Ø table	900 mm
max loading	80 kg
speed	55 RPM
drive	0,37 kW
mean height	1100 mm
L x W x H	800 x 900 x 1600 mm
weight	70 kg

UMS 4 - UNIFLEX Measurement System

Hose measuring tool up to (1 1/4 "). To install in front of the cutter or at a hose coiler. Correct dimensions reduce the assembly time, reduce waste and increase your quality to the customer.

- simple and accurate measuring of the required hose length – no waste
- correct dimensions will save time and money
- direct readout of measurement (cm)
- easily mountable
- lever reset to zero

resettable length counter

simple quick installation on the floor stand or a workbench

Optional: floor stand 514.1 - with a height of 840 mm (33") – used as stand-alone..

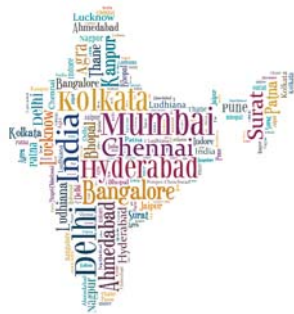

...or to install on our UWT 2 (hose coiling reel)

EM 6.2 Cutting machine

Hoses up to	1 1/4"
Display	in white and black / analog
Digit	5-digit
Size of digits	4,5 mm
Reset to zero	manual
Speed max.	60 m / min
Measurement precision	+/- 2%
Measures up to	999,99 m
Dimension (B x H x L)	250 x 260 x 120 mm
Weight	5 kg

UNIFLEX want to expand further

UNIFLEX plans to open more branches in the near future. We want to make provision for serving the growing markets and look after our customers and agents in India and South America even better.

With a total area of around 3.3 million square kilometres and a population of 1.1 billion, India is possibly the most diverse sub-continent in the world. The rapidly-expanding Indian market means that India is developing fast into an important trading partner.

With 13 countries and 17.8 million square kilometres, South America is the world's fourth-largest continental land mass. With an abundance of mineral resources, mining plays an essential economic role.

Some of the world's largest deposits of copper, tin, gold and silver are to be found in the central Andean belt. Plans as to when and where we will be opening our new branches are not yet finalised, but we will of course keep you informed on how are plans are proceeding.

The people behind the UNIFLEX brand: today we want to introduce you some of our colleagues who work in Goods Receiving / Logistics and Quality Assurance. This is where all deliveries are recorded, checked against the order for composition and quality and booked in ready to be moved to the storage place allocated to them. With some 700 storage locations and over 23,000 different articles, this is quite some task. The newly-modelled Goods Receiving section, recently completed, and the additional storage facilities help us to achieve this.
