UNIFLEX supports UXbuilt certification - because safety comes first

Larger, stronger, more powerful and safer

We not only feel committed to supply our customers with machinery, but at the same time to provide suitable materials, which enable them to produce safe hose lines that satisfy the relevant high technical requirements. More information and downloads at www.uxbuilt.com.

Schlauchleitungs-Fachwerkstatt

Schlauchleitungsmontage mit höchster Sicherheit

Schlauchleitungen sind sicherstelemente im Baubereich und ein wesentlicher Bestandteil der Kraftübertragung in der modernsten Technik. Sie bewerkstelligen die Druckübermittlung und die Speicherung eines hydraulischen Systems und tragen entscheidend zur Funktionsfähigkeit bei.

Werkstattsausrüstung Maschinen und Werkzeuge für alle Arbeitsschritte der Schlauchleitungs- und Montagearbeiten von der Montage bis zur Instandhaltung. Ein perfektes Ausrüstungsprogramm für die Montage von Schlauchleitungen und die Instandhaltung von Hydrauliksystemen. Einzigartig und zertifiziert. Werkzeug, Geräte und zertifikates Wissen.

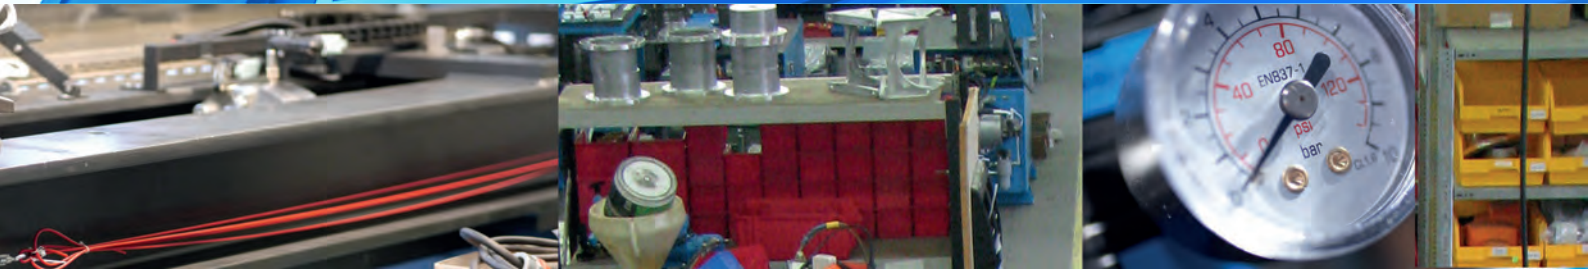

- 1 Sauber und korrekt geschliffene Schläuche**
- 2 Exakt geschliffene Schläuche - innen und außen**
- 3 Sicher verpresste Armlöcher**
- 4 Geprägte Schläuche**
- 5 Geeignete Schlauchleitung**
- 6 Geprüfte Schlauchleitung**

<h4>4 Marked hose assemblies</h4> <p>Due to DIN EN ISO each hydraulic hose assembly has to be permanently marked with name or logo of manufacturer, manufacturing date and maximum working pressure of the hose assembly.</p> <p>By the marking the installed hose assembly the service of life can better be proofed. The clear identification is an essential part for the integrity of the hydraulic system, and most importantly the safety of people and equipment.</p> <p>Advantages of the marking</p> <ul style="list-style-type: none"> A clear identification of the hose line is possible Allows for quick and easy replacement Production date of the hose line is visible for everyone Safety in the installation with regard to compression Complies with all requirements of DIN EN ISO <p>Potential risk by incorrect marking</p> <ul style="list-style-type: none"> Incomplete information to the technical parameters Marking permanently unreadable or not Marking in missing generaly - not permitted 	<h4>5 Cleaned hose assemblies</h4> <p>UNIFLEX cleaning machines remove contamination in the hose so the specified standards can be met.</p> <p>All hose assemblies are then free from cutting debris, dirt, liquids and contamination.</p> <p>Advantages of cleaning</p> <ul style="list-style-type: none"> Clean washed hoses Internal cleaning with the retardant Achieving a clearly defined purity according to ISO 4406, ISO 4405 or NAS 1638 or special standards. <p>Uncleaned hoses can damage to a machine cause and thus the failure of the result in entire hydraulic systems.</p> <p>Cleaned and tested hose assemblies and incorporate caps guarantee a safe usage.</p>	<h4>6 Tested hose assemblies</h4> <p>Modern UNIFLEX test benches offer various marked options and allow flexible testing with adjustable proof pressures.</p> <p>Tested and if required, certified hose assemblies guarantee safety when in use.</p> <p>Advantages of the test</p> <ul style="list-style-type: none"> Test result is with test report for the customer documented Preservation of pipe by use of neutral cleaners Tested products guarantee safety when using 	<p>Trust your work to our best</p> <h3>Assembling hose and fittings with UNIFLEX machines</h3> <p>Assembling hose and fittings with UNIFLEX machines</p> <p>www.uxbuilt.com</p>

MACHINE UPDATE

You can find our new developments, new entrants and improvements here. This time the focus is on the UA4 Vertical Crimper, which is used worldwide thanks to its single-phase series drive, as well as the UNE115 nipple push and pull-out machine for armatures with nominal widths of up to 3". For more information, please send us an e-mail or contact your vendor.

UNE115

UA4

flexm@il 01/2014

FLEXM@i 01/2014

Available now

UNE 115 - High-performance accessories for the professional workshop sector up to 3"

- Version with universal clamping dies
- Now without troublesome die changing
- Dual fork kits for rapid and perfect push-in
- New two-hand operation & foot-operated switch
- Length-adjustable clamping unit
- Zero maintenance and wear contributes to cost savings

Available now

UA4 - Powerful vertical workshop crimper with series single-phase drive

- Open compression die for easy pressing of even 90° fittings
- Horizontally sliding die pusher for good accessibility
- Divided crimping die set for simple and rapid tool changing
- Allows crimping up to 1½ " 1 piece fitting and 1¼ " - 2 piece fittings at hydraulic hose assembly
- Fits easily into any workshop or service vehicle

UNIFLEX trade fair calendar update - come and visit us.

Whether you visit us at the TUBE in Dusseldorf from 7 to 11 April 2014, or at coming CONEXPO IFPE in Las Vegas, we look forward to seeing you. We will be present with our latest machines and talking to you about technical issues such as on technical developments and our affiliate program. Here you can see what our shows in March and April will be.

CONEXPO IFPE (04.03-08.03. 2014)

<http://www.conexpoconagg.com/>
Las Vegas (USA)
Booth #81755, South Hall 3

FASAD - 2014 Construction Fair (12.03-15.03 .2014)

21st International Specialized Construction Expo & Fair
www.balticfair.com
Kaliningrad (RU)
Booth, Hall:=
(joint booth with GITEX Gr., RU: www.gitex.ru)

SMOPYC 2014 (01.04-05.04. 2014)

INTERNATIONAL SHOW OF PUBLIC WORKS,
CONSTRUCTION AND MINING MACHINERY
<http://www.smopyc.es/>
Zaragoza, Spain (ES)
Booth/hall:
Joint booth with Rayflex

TUBE 2014 (07.04-11.04.2014)

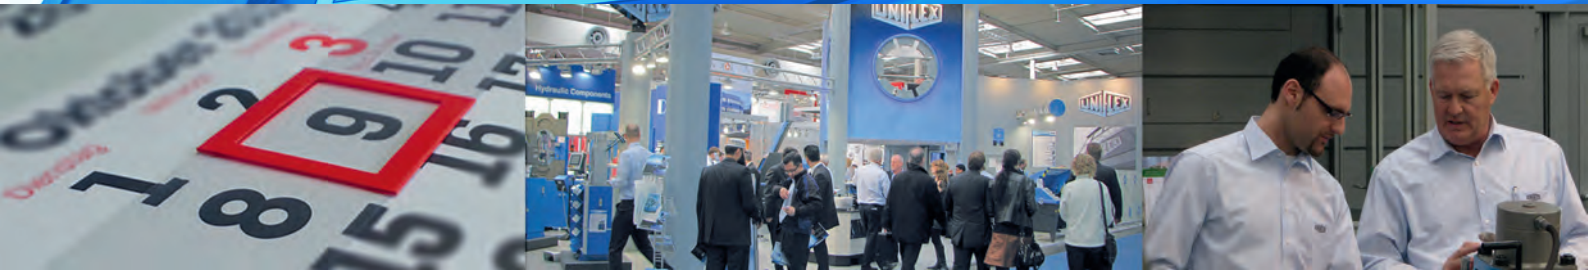

Internationale Rohr-Fachmesse Dusseldorf
<http://www.tube.de>
Dusseldorf
Hall 05, booth 5G12

Caspian OilTech - Atyrau-2014 (01.04 -04.04.2014)

Caspian Regional Oil & Gas Exhibition
www.atyrauoilgas.com
13th North Atyrau (KZ)
Booth, Hall: joint Stand with GATEWAY Group
(KZ: www.gvcal.com)

People at Uniflex

The people behind the machines: They account for the success of the UNIFLEX brand. Today we present you with some new employees who are supporting you world-wide or very close to you. At this point a "warm welcome" in the Waitz group of companies.

Uniflex Hydraulik GmbH Germany is expanding its design sector and growing in this increasingly customer-oriented market with additional staff. Uniflex is thus meeting the changing market needs as a global leader for hose manufacturing machines.

Ralf Schmitt
Bachelor of science
Specialist area: Development and design
Uniflex Hydraulik GmbH Deutschland

Lukas Zientek
Diplom-Ingenieur (FH)
Specialist area: Development and design
Uniflex Hydraulik GmbH Deutschland

Juan Tohero
Inside Sales Latinamerika
Specialist area: Sales and consulting
Uniflex Hydraulik Lateinamerika

With their extensive experience and expertise, the team at the technical office support and alleviate you, and they complement the UniFlex product range in an ideal way. In future, Ralf Schmitt B.Sc. will take over project management and production support with a focus on test benches and peeling machines and Lukas Zientek Dipl.-Ing. will be performing the same role in the areas of service and industrial presses.

Furthermore, we look forward to welcoming Mr. Juan Tohero in our Latin American office, who will be supporting our sales team in future.

We would thus like to wish all three colleagues a good start and interesting activities.
